

Lygon Street Main Drain Renewal

Capital City Trail: Lygon Street crossing closure
Wednesday 14 January to Tuesday 20 January

12 January 2015

A critical stormwater upgrade will be commencing in Brunswick East this week. The work will require the temporary closure of the Capital City Trail crossing at Lygon Street. Detours will be in place for cyclists.

What is happening

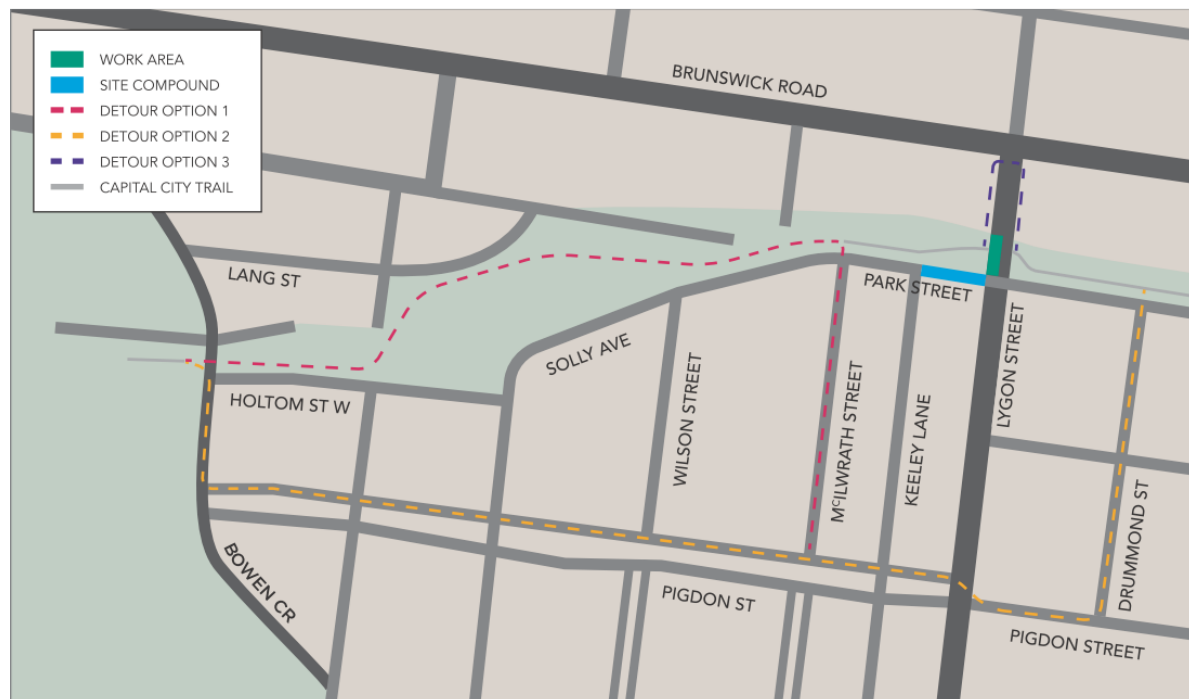

A 40 metre section of the Lygon St Main stormwater drain has reached the end of its service life. To ensure that the local stormwater system continues to operate efficiently, we will be replacing this small section of the drain in Lygon Street, between Park Street and Brunswick Road.

When work will take place

7am on Wednesday 14 January to 1am on Tuesday 20 January.

How the work will impact cyclists

The Capital City Trail crossing at Lygon Street will be temporarily closed. The map below indicates a range of detour options that will be made available to cyclists.
